### **What if I am at a dual meet or tournament and find that I have a school that I did not enter previously and uploaded to the Mobile Web Server?**

By design, you do not have the ability to enter schools and or wrestlers on your mobile device (**Mobile Web Server**). If we allowed this, there would be issues when importing into your existing season stats on the desktop. We suggest creating a school on *Champion Wrestling Stats* desktop named **TBD** and use this when you wrestle a school that is not currently on the **Mobile Web Server**.

### **I find it cumbersome to always have to type in the URL for the Mobile Web Server ([www.mobilecws.com](http://www.mobilecws.com)). Is there an easier way?**

Yes. Create a **Home Screen** bookmark.

1. Use **Safari** to navigate to [www.mobilecws.com](http://www.mobilecws.com).
2. Tap the boxed arrow button at the top/bottom of the screen.
3. Choose add to **Home Screen**.

### **I am having trouble getting my Downloaded Matches file (cwsstats.csv) to save in the proper location. My browser is not giving me an option where to save the file.**

The download file location and how to save the download file varies from browser to browser. It is important that your download file be saved as **cwsstats.csv** in a known location (We suggest **c:\cws50\webin**) . When importing matches, *Champion Wrestling Stats* desktop looks for **CWSSTATS.CSV** by default in **c:\cws50\webin**. Here is a link to a **Help** document for **Changing Download Location** in Mozilla Firefox, Internet Explorer, Google Chrome and Safari.

**I have added user-defined stats for N4 (4 Pt Near Fall) and N5 (5 Pt Near Fall). Their point values are not reflected in the SCORE when tapping the maneuver in the Match Detail screen.**

Each user defined maneuver must be given a value for the number of points (if any) earned each time a maneuver is tapped. This is done on *Champion Wrestling Stats* desktop by clicking **Setup | Settings** and then clicking on **User-Defined Stats** tab.
