

What is *Mobile Reports*?

Mobile Reports is companion software to **Champion Wrestling Stats**. This product allows a coach to have all current season's statistics or previous season's statistics and wrestler information available on any mobile device (iPad, iPhone, Android, smartphone or tablet) that has Internet capability.

The program, **Mobile Reports**, resides on a **Mobile Web** server maintained by **Preferred Educational Software**. No software is installed on the mobile device.

When a subscription for **Mobile Reports** is purchased, the user creates a school account and is given login credentials (**Login ID and Password**). The user opens their browser and logs in at www.mobilecwsreports.com.

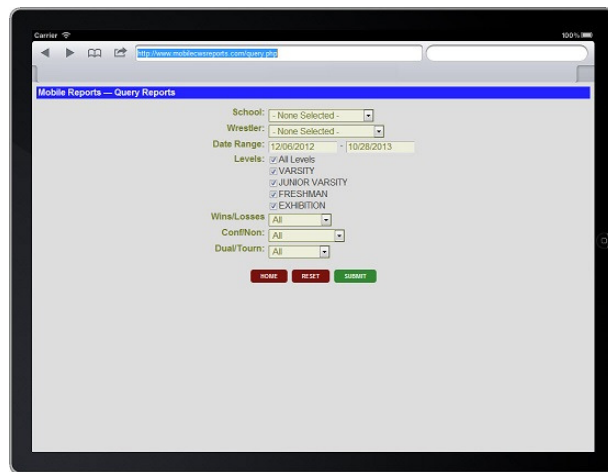

A school's current or previous season's data (wrestler information, and match information) is uploaded to the account of the user. A coach can get **Query Reports**, **Category Leader Reports**, and **Profile Reports** at any time without the need to print out masses of paper reports. These reports can be very helpful at **Seeding Meetings** and also useful as a **Scouting Tool** checking results of previous matches with a specific school or wrestler.

The **Mobile Reports** subscription (**Annual** or **Lifetime**) is a building license allowing multiple users to access their school's account at one time making it convenient when there are multiple coaches in the program.
